

Name:

(M14): I/E: Evaluating Internet Health Information

After viewing the National Library of Medicine tutorial on Evaluating Internet Health Information, Google a health topic of your choice. Evaluate the top three sites in the space below.

What is the topic you are researching? _____ ADHD _____

1. Website Name and URL: Center for Disease Control and Prevention (CDC) -
<https://www.cdc.gov/adhd/>

What clues do you have to help determine the validity and reliability of this website?

- It is a .gov website
- It is written and reviewed by medical professionals
- There are cited resources, no ads, and updated dates

Using the checklist, would you trust the site?

Yes, I would.

2. Website Name and URL: Mayo Clinic - <https://www.mayoclinic.org/diseases-conditions/adult-adhd/symptoms-causes/syc-20350878>

What clues do you have to help determine the validity and reliability of this website?

- It is a .org website
- It is a non-profit organization
- The articles are reviewed by doctors
- It has evidence-based content and not product promotion

Using the checklist, would you trust the site?

Yes, I would.

3. Website Name and URL: CHADD - <https://chadd.org/>

What clues do you have to help determine the validity and reliability of this website?

- It is a .org website
- It is a non-profit
- Supported by the CDC
- They have experts
- They have a clear mission and updated resources

- No obvious bias

Using the checklist, would you trust the site?

Yes
